

## CROSSFIRE COMPONENTS

The Glass Crossfire Set-up uses several different Carlisle parts. See the individual part pictures and descriptions below. The crossfire set up has also been successfully employed as a tooling bench for borosilicate ground joints which are gaining in popularity.

Glass Fire Burners (Bulletins 24B) find many uses in a Crossfire Set-up where used with hex elbows or ball joints with welded stainless steel manifolds and sliding bases. To obtain best results we recommend the use of the Carlisle Venturi Mixers in all gas/air applications (Bulletin 17C) and Carlisle Valves (Bulletin 16A).

The Carlisle Sliding Bases (pair), part number 24A005-0000 are made of cast aluminum. They are used to permit adjustment of fires vertically .

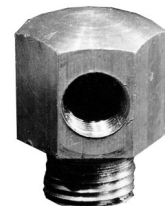

The Vertical Risers (pair), part number 24A004-0000 are 3/8 pipe x 12" long unless other lengths are specified by customer.

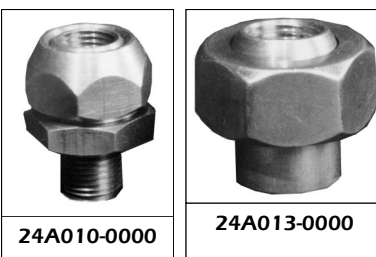

Manifolds (Stainless Steel)

Catalog Number	Manifold Type
24A017-0000	3 Way
24A018-0000	4 Way
24A019-0000	5 Way

Catalog Number	Outlet Pipe Size	Inlet Pipe Size
24A001-0000	1/8	1/8
24A002-0000	1/8	1/4
24A003-0000	1/4	1/4

Hex Elbows

CATALOG NUMBER	Ball Joint
24A010-0000	Ball 9/16" Diameter, 1/8" FPT and socket, 1/8" MPT and lock nut
24A013-0000	Ball 3/4" Diameter, 1/4" FPT and socket, 1/4" MPT and lock nut

Pressure Tested/Leak Tested Manifolds For your multiple torch applications. "B" left and right hand fittings. 1 input with various outputs, 2, 4, 6, 8, 10, and 12 outlets for your shop. Made from all Stainless Steel. Excellent for mobile applications (teaching). Call your Carlisle representative and ask us about our manifolds!

Catalog Number	Manifold Type
24A000 0008	1 Inlet & 8 Outlets Gas
