

HANDI TRAYS

Large Handi Tray with Paddle

Small Handi Tray with Paddle

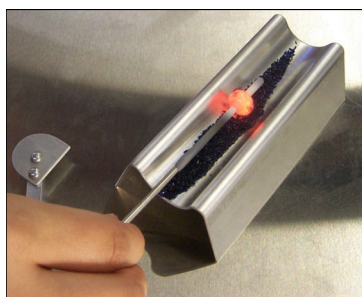

Mini Handi Tray with Paddle

The Handi-tray is perfect for powdered glass and frit. For those of you who are not familiar with this – the powder is poured into the tray and the glass object is rolled into the frit or powder inside the tray. The curved shape allows for even application to any project, and also easy clean up. A matching paddle is used for moving the frit or powder inside the tray.

All five products are made from 1/8" thick aluminum making them a sturdy and long lasting product. The Handi-trays are available in various sizes, a Mini model, a Small 6-inch model and a Large 10-inch model. The handle on the Regular Paddle is approximately 10 inches long, while the handle on the Mini Paddle is approximately 5 inches long. All items sold separately.

Regular and Mini Paddle
