

HIGH-CAPACITY HAND TORCH

The High-Capacity Hand Torch is similar in design to the Universal Hand Torch. However, the High-Capacity Hand Torch is available with only one size of nozzle. The nozzle size is 7/16" with a 7/16"-24M thread. This Hand Torch is not compatible with the 3/8" or 1/4" nozzle from the Universal Hand Torch series. The larger nozzle offers a higher flow capacity while also accommodating the correct thread connection size for some of the larger tips offered by Carlisle. The High-Capacity Hand Torch can be used with a mixture of natural gas, propane, or mixed gas and air or oxygen.

The High-Capacity Hand Torch is manufactured of brass with chrome plating for the nozzle, feed tubes, and valve body. Red and green anodized aluminum valve handles are standard. The mixing of gases takes place inside the torch body, enhanced by the carburetor unit. The High-Capacity Hand Torch is balanced to allow a comfortable grip and still afford ease of movement. Carlisle also offers the option of an ergonomic wooden handle that encases the feed tubes.

High-Capacity Hand Torch with Universal Bench Stand

An additional option is the Universal Bench Stand. The Bench Stand allows the High-Capacity Hand Torch to be set into a clamp that holds the torch by the feed tubes. This clamp holds the Hand Torch at an angle so that the Hand Torch may be used as a bench burner. The clamp arm has versatile articulation for effective positioning of the torch. The lightweight Bench Stand must be secured to the bench top for safety during use.

CATALOG NUMBER	DESCRIPTION
22E004-0000	High-Capacity Torch Package with Brass Nox-2, Nox-4 & 19 Hole Hush Tip
22E001-0000	High Capacity Hand Torch Body with Carburetor
