Lucio Burner On Mini CC Base  
10D002-0100  
Approx. 6075 Btu's @ 2 psi.

Original Lucio  
Torch Face

Lucio Burner

Lucio Grande

New!  
Lucio Grande Torch Face

Lucio Burner w/ stainless  
porous marver and  
Limited Edition Base

Designed to meet the needs of the professional soft glass fameworker, the Lucio Burner is the premier torch for sculpting in soft glass. Using low pressure fuel gas and oxygen, this torch provides a soft, wide flame, that promotes less stress in the glass, helping to avoid cracks and allowing the artist to work larger projects.

The Lucio Burner with the "Dragon Casting" is no longer available. Incorporated into the Limited Edition design By Lucio (shown on right above) is a rod system that provides 2 inches of vertical height, allowing the operator to get under the flame for larger sculpture. The ever flexible "Crowley" marver can be added on or the porous stainless steel marver that Lucio prefers. Both easily mount on top of the burner.

Also offered is a new version of the Lucio torch. At Lucio's request an additional row of ports has been added (shown top center), allowing the experienced sculptor to attempt even larger projects. The additional row of ports offers the same soft, broad flame as the original model and will fit all Carlisle mounting bases. Approx. 10750 Btu's @ 2 psi. For Lucio Grande.

See our website for more information or call your Carlisle Representative. Designs by Lucio Bubacco, performance by Carlisle.
