

LUCIO BURNER

Lucio Burner with Dragon Casting
10D001-0100

Lucio Burner with no Casting
10D002-0100

Lucio Burner Face

Designed to meet the needs of the professional soft glass framemaker, the Lucio Burner is the premier torch for sculpting in soft glass. Using low pressure fuel gas and oxygen, this torch provides a soft, wide flame, that promotes less stress in the glass, helping to avoid cracks and allowing the artist to work larger projects.

The Lucio Burner with the "Dragon Casting" is the perfect blend of form and function. Cast in a heat resistant bronze from a design sketched by Lucio Bubacco, the torch becomes a work of art in itself. Incorporated into this design is a rod system that provides 4 inches of vertical height adjustment, allowing the operator to get under the flame for larger sculpture. The torch top graphite marver that sits on the crest of the dragon's head features an angle adjustment. A separate angle adjustment is also offered for the head of the burner.

Also offered in a more economical model, the Lucio Burner is available without the casting. In this version, the burner is instead affixed to a Mini CC Base, where the burner head is adjustable via a ball joint articulation. This model produces the same flame characteristics, although it does not feature the graphite marver nor the vertical height adjustment.

BURNER	CATALOG NUMBER
Lucio Burner with Casting with Hose Barb Adapter	10D001-0000
Lucio Burner with Casting with Welding Hose Adapter	10D001-0100
Lucio Burner with Mini Base with Hose Barb Adapter	10D002-0000
Lucio Burner with Mini Base with Welding Hose Adapter	10D002-0100
