Carlisle Opposing Fire Tipping Torches are manufactured from copper tubing. There is also an ergonomic wooden handle on the main tube. These torches are designed to be lightweight, as they do not have any valves or mixing devices incorporated in their design. The valves and mixing units will need to be purchased separately and mounted remotely. A fire check is also recommended if using gas and oxygen. The Opposing Fire Tipping Torch is premixed and can be used with natural gas or propane and, depending on the model, air (01, 02, 03) or oxygen (04, 05, 06).

These torches can be ordered with custom dimensions and features at a minimum cost. These hand torches come with burners supplied unless specifically ordered without them.

MODEL NUMBER	TORCH NUMBER	OVERALL LENGTH	BETWEEN TIPS	INLET SIZE	THREAD SIZE	BURNERS SUPPLIED
01	253-N	9 1/2"	1 11/16"	5/16" OD	1/4"-27F	228-N
